

# LEEUWARDEN BY-PASS

2011, Leeuwarden, The Netherlands

The extension of the N31 highway around Leeuwarden needs a design to embed the "Haak om Leeuwarden" into the Frisian landscape. Because the new highway runs through the historic Middelzee area, the metaphor of the "terp" was used to create both a natural link to the landscape as well as a landmark in that landscape to emphasize the transition to the city of Leeuwarden.
